

# How to Block an Internet Website So Students Can't Access It

## Easy way:

Write down the website address. Put it in Mr. Friedman's or Mr. Padilla's box with a note that the website should be blocked.

## Direct way:

Go to **muirms.com**

Click on **Help** on the gray bar.

Go down the page to **ITD Self-Service System**. Click on it.

Type in your login name and password (the same as you use for ISIS). Click on **Login**.

Click on **Submit a Request**

In the left-hand column go down to where it says "Floor / Room" Type in **your floor** in the first box and **your room number** in the second.

Go back up to the top of the second column. Find where it says **Category**. At the very end of the field there is a symbol that looks like a box without a top. Click on it.

Click on **Network**

Click on **Blocking or Unblocking of a Website**

Go down to the **Description** box.

Type in "Please block website [www.porno.com](http://www.porno.com) (or whatever website you want blocked)"

Go down to the bottom of the page and click on **Submit**

ITD will block the website within a few hours.
